

Mathur wins the Abdul Kalam Award

Prof. Nilmani Mathur was awarded the Dr. A P J Abdul Kalam HPC Award by Cray Supercomputers in an online ceremony on 18 September, for "predicting the mass spectra of various subatomic particles, including exotic hadrons, through firstprinciples calculations of quantum chromodynamics on space-time lattices." The prize is given by Cray, a USA based company that manufactures supercomputers, in memory of former Indian president and scientist Dr. A P J Abdul Kalam. It recognizes outstanding research relating to high performance computing by researchers in India.
