

## Procedure to use Eduroam wireless network in Mac Book

### Operating System Compatibility

- Mac Book 11 (Big Sur)

Users are requested to keep their systems updated as older MacBook such as Mac Book Sierra was not compatible for the same.

To configure wireless parameters, one must have administrator's rights on the device.

1. Click on the wireless icon in the top menu.
2. Select **eduroam** network.
3. When prompted, login as follows
  - Username: [username@tifr.res.in](mailto:username@tifr.res.in) .
  - Password: your LDAP/roundcube password.
4. Click on **Connect** button to get connected to the network.
