

Procedure to use Ivanti Secure Access in Windows operating system

Operating System Compatibility:

- Windows 10 (32 bit and 64 bit).

Tested on above flavor of Windows. May work on other flavors of Windows also, users can try.

Download the Ivanti Secure Access client using the link below.

For Windows 32 bit:

https://ftp.tifr.res.in/software/Pulse_Secure/Ivanti_Secure_Access_22.3-R1_Win32.msi

For Windows 64 bit:

https://ftp.tifr.res.in/software/Pulse_Secure/Ivanti_Secure_Access_22.3-R1_Win64.msi

After downloading, follow the below steps to install and configure the client.

1. Double click on the setup file and follow the on-screen steps to install the same.
2. Open the installed Ivanti Secure Access in your machine.
3. Click on + symbol to add the connection.
4. Under Name field type as 'TIFR VPN'.
5. Under Server URL field type as <https://sslvpn.tifr.res.in/tifruuser>
6. Click on Connect button, it will ask for your credentials.
7. Enter your LDAP/roundcube credentials and click on Connect button to get connected to the SSL-VPN.
8. Once connected, you will get IP address in the range of 158.144.38.x series.
